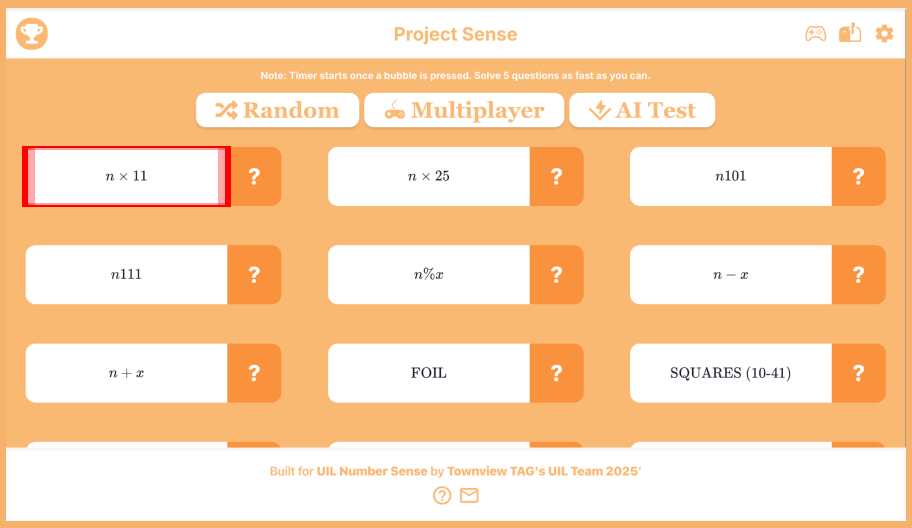
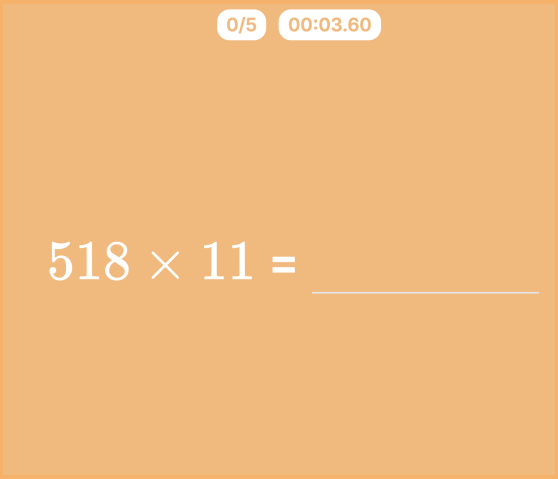
# Project Sense Manual

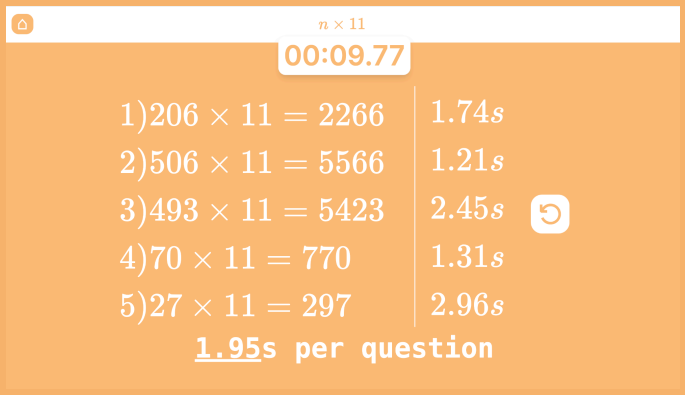
Welcome to Project Sense! This document will inform you about the features of our site.



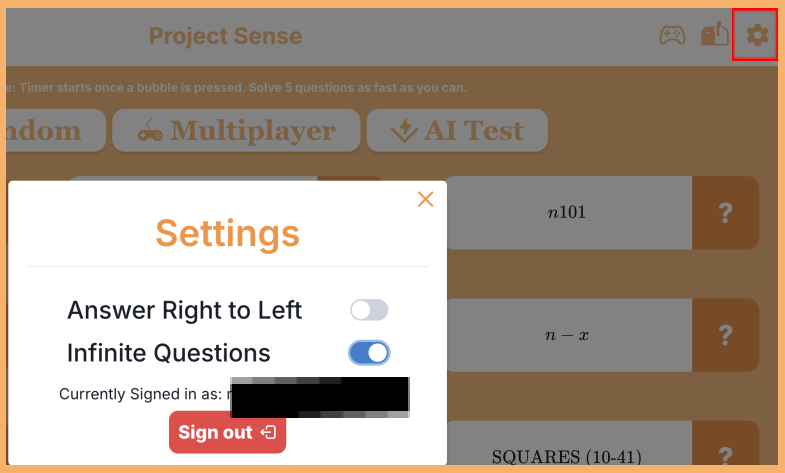
**TRICKS**: Each white box contains a trick type.

When you click on the trick, problems will appear. Once you input the correct answer to a question, the next problem will appear.



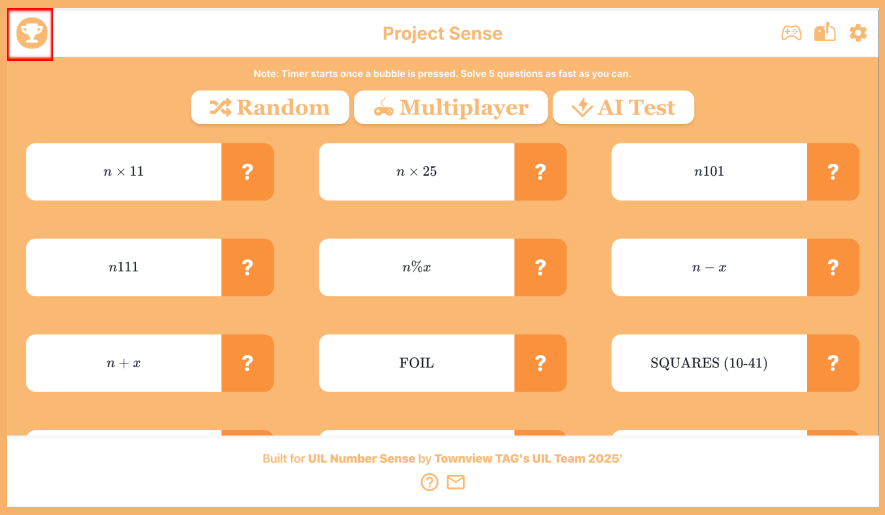


A summary of your results will appear once you finish five problems.



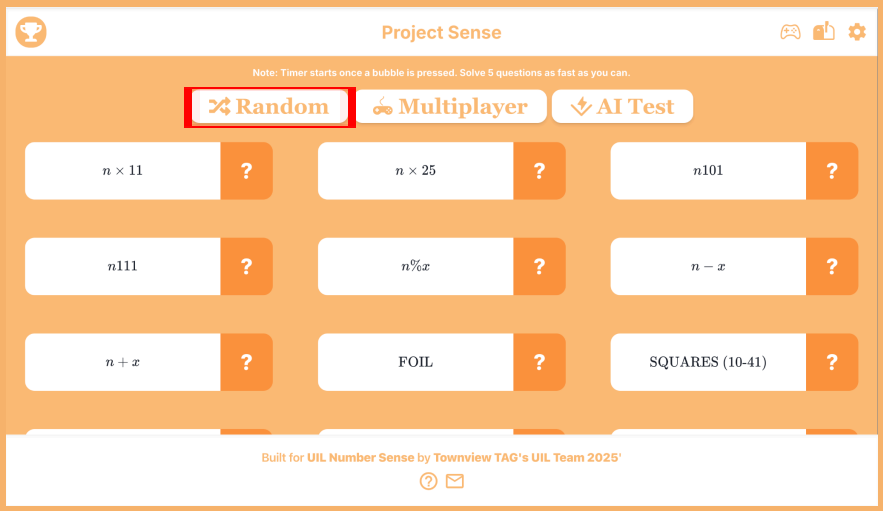
**SETTINGS**: Alternatively, in the settings, you can select “infinite questions” for unlimited practice. For problems that require answering from right to left, that option is also available in the settings.

**LEADERBOARDS**: Your fastest solve time for five problems will appear on the leaderboards. Click on the trophy icon to access them.



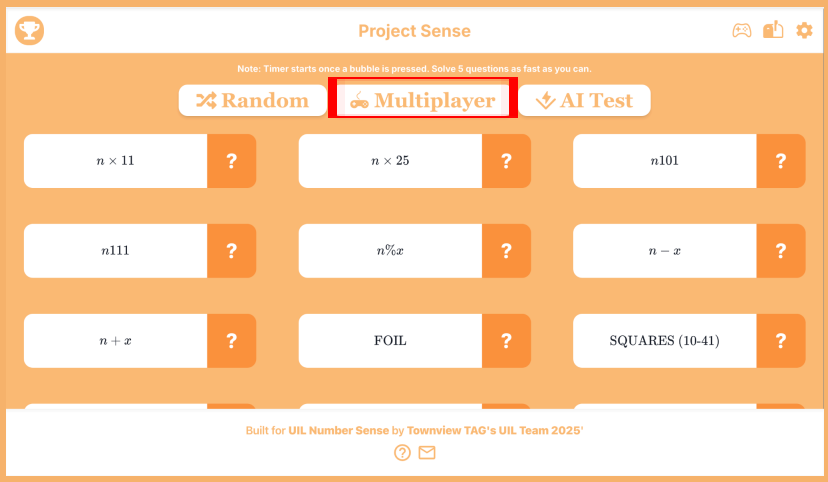
Choose from the dropdown menu to view leaderboards for each trick. Compete against your friends and climb to the top!

**EXPLANATIONS**: Unsure how to do the trick? Click on the orange question mark to watch video solutions.

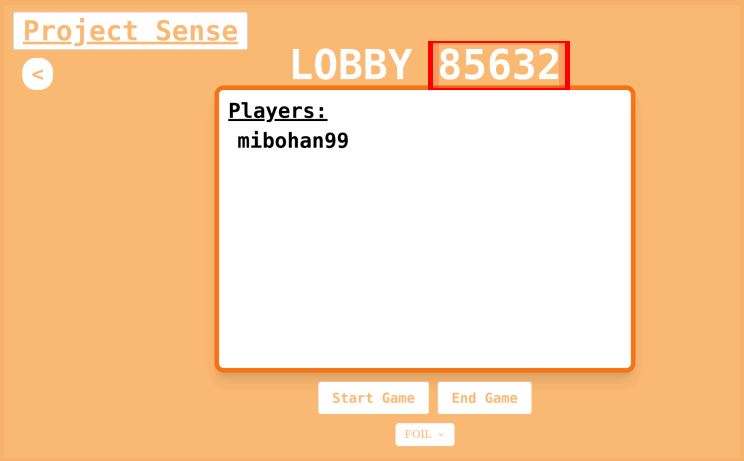


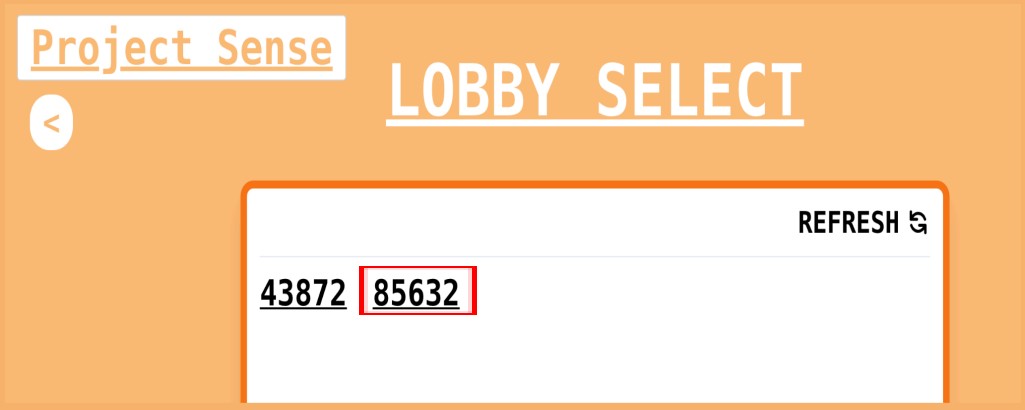
**RANDOM**: The random option allows you to practice all of the tricks at once to produce a variable experience.

**MULTIPLAYER**: Project Sense VERSUS FRIENDS!!! Multiplayer allows you to create a game lobby and find game lobbies to join.



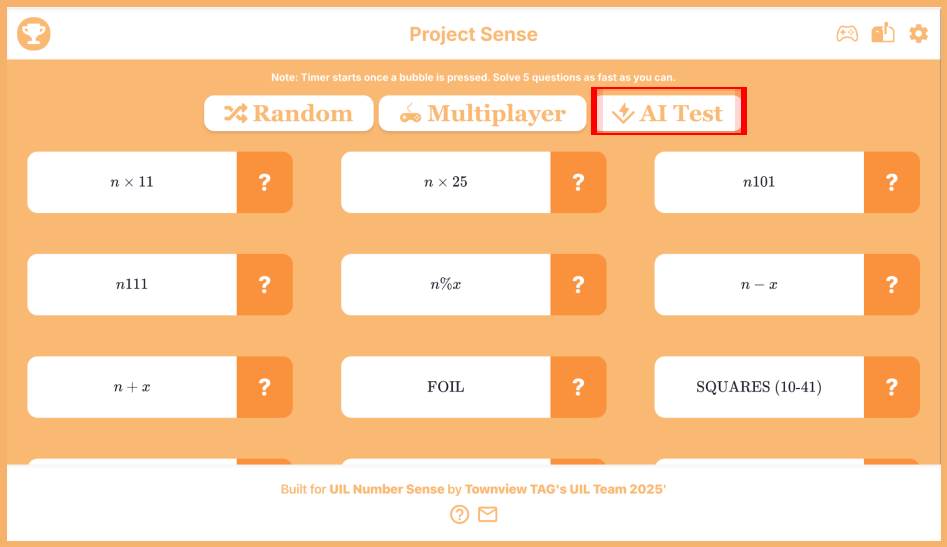
When you create a game, you create a lobby with a unique code. You can find the lobby in the find game area. Choose the trick type in the dropdown menu.





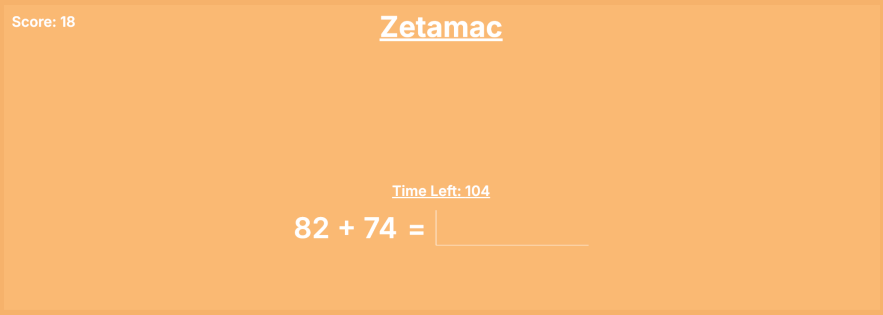
Ensure the lobby codes match.

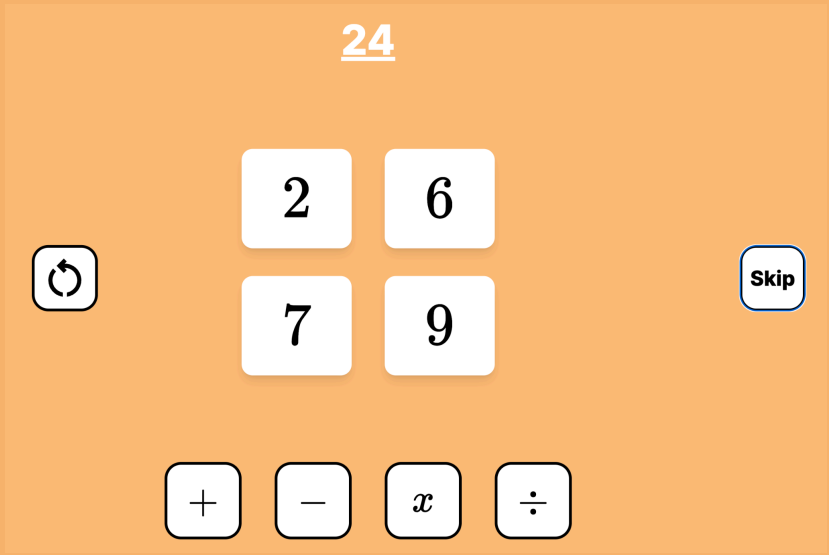
**AI Test**: Want to simulate a real test? Practice with our AI-generated test feature trained on official UIL tests. (work in progress - grading is slightly inaccurate and we currently only display 40 problems)



**MINI GAMES**: Want a break from number sense? Play our mini games! We have an easy version of Zetamac and the card game 24.

**ZETAMAC**: Warm up with simple math operations. Solve as many problems as possible in 120 seconds.





**24**: Use all four numbers exactly once, with the operations provided, to obtain a final answer of 24.
(ex:
9 - 7 = 2
2 + 2 = 4
4 * 6 = 24)

**CONTACT US**: Have suggestions or inquiries? The question mark sends you to a Google Form to suggest changes or additions to Project Sense. Click the mail logo to email us (projectsense.ns@gmail.com).
